

Americana *Magnetic*

Decorative Spear End Collection

Neodymium Magnets:

Neodymium magnets are considered to be the strongest magnets on earth. Magnets are capped in rubber to prevent any door surface damage, and to improve the holding strength of the hardware. The magnets will hold 99% of their strength over 10 years.

ABS Polymer Plastics:

Lightweight, durable ABS plastic, great for exterior door application. UV stabilized to withstand the harshest weather extremes of sun, heat and cold. American *Magnetic* hardware will not rust, chip or have paint bleeding issues.

Save Time, Installs in Seconds:

Eliminate pre-drilling and screw attaching Decorative Hardware. Fast, simple application makes impulse sales a natural. Other than a tape measure, there are absolutely no tools required. Save time and increase sales!
